Name: Remake of Pokemon CAWPS: Remake of Pokemon Emerald. Crizzle. Source: click here! Description: Pokemon CAWPS is different from my previous hack, Pokemon Outlaw (appropriately called FireRed for adults). If you haven't played Pokemon Outlaw yet, you should check it out (not for toddlers though). This is the story of a young man or woman who is a police officer in the Hoenn area. Just like in Outlaws with Kanto, this Pokemon is not the same Hoenn you experience in R/S/E. These Hoenn's people are a little more realistic (and by that I mean crazy). At times I'll try not to be as lousy as in Outlaw (I REALLY pushed some limits so I shouldn't darken the game a bit), but it will be about the same style albeit very educational down. If you didn't like Outlaw, you probably won't like this game either. I also want to apologize in advance WARNING: Like Outlaw, this game will probably get at least a T (if not an M or worse) on the ESRB rating system. There is also a lot of violence, death and other things described/shown in this game. If that bothers you, this game is probably not for you. Attributes - Nothing really special... This gives you two starter Pokemon. (You pick one, you just get the other.) à "Funny" dialogue (or really offensive, if you've played Outlaw you know the drill). Honestly, it's not the same as Outlaws. I calmed down a little. à Grinding Cave (cave built for grinding levels, really important in the end game) à No gym challenges or pokemon league (I'm tired of the same old formula, I mix everything up). You can be a fucking cop, that's great! (I think I got the idea from that horribly funny movie "Let's Be the Police" or maybe a hint, I don't know). That means you do all kinds of police work. Female lead option - not much of a feature film, but a success for me. I am usually too lazy to register a female variant. I realize there are quite a few girls on these forums (some of you tell me I'm single) so I have to stop being a woman-hating pig. just hit me on the shoulder. As a result, the "story" tries to be gender neutral. -The evos in the store are moonstones. And Eevee will transform into Umbreon with Moonstone and Sunstone transforming into Espeon. You can also buy gems that you can't in Pokémon Emerald from the Lilycove store. Not exactly a feature but whatever. - Not really a feature either, but I made a moveBreak stronger. I always thought why Rock Smash was always so weak. So I made this decent step in this game. It will not be a game - all people III. You know how I was driving, I would copy it to an old school. Flush with a fucking past. In addition to 386 (?) Pokémon, this is a lot. You don't have to spend 700 and most of the best are 1386 (in my opinion) fishing. Fishing is hatred. Fishing is death. - Page. This is just my personality. When I finish my main story, I just can't motivate myself to create content after the match. If I ever divorce again, I'll do it first after the match. Scenshots: Playing: Download: Download Pokemon Cawps completed another creator: CrizzlePersion: Comethack of: Emerald Updated: 2016 August 00 d. Pokémon Cawps differs from the previous Pokemon Outlaw author (rightly called "fied for adults") by the field you played pokemon outlaw, you should check it out (but not for young children). Remember to try Pokémon Azure Panorama's description is the story of a young man/woman who becomes a police officer in the Hon region. As outlaw with Kant, this is not the one you knew Pokemon r./s/e. The people of this Honna are a bit more realistic (which is why I mean crazy). I try not to be as scary as Outlaw (I have crossed a few lines that make the game not darker), but it is like the same style, though really gentle. If you don't like a banker, you probably won't like this game. I also want to apologize in advance for the alert: Like Outlaw, this game is likely to collect at least T (otherwise m or worse) in the ESB scoring system, which Paul performed. In addition, there is a lot of violence in this game, death and described / presented. If you don't like it, this game is probably not for you. Functions you will get two budding pokémons. (You choose one and the other is given to you.) Funny dialogues (or really offensive, you know the exercise if you play a banker). Although, frankly, it's not the same as banita. I arranged a little bit. Large Cave (Crot created for grinding is really important in the late game) no problem in the gymChoosing a female protagonist isn't really a feature, but it's a feat for me. Usually I'm too lazy to include a female version. I noticed there are quite a few girls on these forums (some of you guys are hot, call me single) so I need to stop being a slut who hates women. I'm just gonna pat you on the back. As a result, "the story" tries to be gender neutral. Business evolution is achieved by moonstones. And Evie evolves into Umbreon with Espeon in Moonstone and Sunstone. You can also buy gems from the Lilycove store, which cannot be done with a Pokémon Emerald. It's not exactly a feature, but whatever. It is also not a characteristic, but I reinforced the blow with a stone. It always bothered me why Rock Smash was always so weak. So, I made a good shot in this game. Download Pokemon Screenshots CAWPS is the first Pokemon cheat like never before. Often players become the hero of a Pokemon game and are tasked with saving the world from an evil team with evil ambitions, blah blah blah...not with CAWPS! In this game you will play the role of a policeman in the Hoenn region. People here, as usual, are abnormal, they are more realistic (perhaps they can be called crazy). This game depicts a lot of violence, death. So CAWPS is definitely a Pokemon game for adults, not kids. Features There are two starter Pokémon at the start. You choose one, another is given. Lots of funny adult dialogues and conversations. There is a grinding cave for training and combat. This is very important at the end of the game. There are no gym competitions or Pokémon leagues. The author does not like this formula. As a police officer you can catch criminals, interrogate them and much more. The main character is gender neutral. The Rock Smash move is now more powerful. There are no new generation Pokémon after Generation III. Only 386 Pokémon from the first three generations are eligible and are enough. No fishing at all. For published and downloadable games, we will show video tutorials on how to download files and emulators for Windows/Mac/Android/iOS and use them while playing on your devices. Next Read Developer: Version Crizzle: Complete Hack By: Emerald Updated Aug 13, 2016 Pokemon CAWPS is different from my previous hack, Pokemon OutlawNamed after adults). If you haven't played Pokemon Outlaw, you should check it out (not for little kids). This is the story of a young man or young woman who becomes a police officer in the Hoenna region. This is not the same hoenn you knew in Pokemon R/S/E. The inhabitants of this Hoenn are a little more real (I mean crazy). I'm going to try not to be as terrible as I was during Outlaw (I actually crossed lines that I wouldn't cross if the game was a little darker), but it will be more or less the same style, albeit very low key. If you don't like Outlaw, you probably won't like this game either. I would also like to apologize in advance. Like the previous Hack Pokemon Outlaw, it has a dark theme, although CAWP is more toned down. Note: This game would probably get at least a T (if not m) on the ESRB rating system. This game features a lot of violence and death. If you don't feel comfortable with that, this Romhack is probably not for you. The two original Pokémon. "Funny" (or really offensive) dialogue. Cave grinding (the cave created for the grinding level is very important in the late game). No gym challenge or pokemon league. You become a police officer. A hero for a female protagonist. Smash Rock is now stronger. EVO trading is made from moon rocks. Evoli evolves with Moonstone and Espeon Suskstone, Umbreon. You can also buy stones from the Lilycove shop, which Pokemon Emerald couldn't do. Info ROM Original Pokemon Emerald File Pokemon Emerald (EU) is an IPS patch. You can use Moon IP addresses to apply the fix. Note: Try to use Pokemon Emerald (ES) ROM (ES) ROM (ES) ROM Pokemon Emerald (U) if possible. Had some issues with (u)rom. This is the story of a young man or young woman who becomes a police officer in the Hoenna region. However, this is not the same Hoenn that you knew in Pokemon R/S/E. The inhabitants of this Hoenn are a bit more realistic (or crazy). Note that relatives do not exist in the game: everything after Gen III. Fishing. After the match. The Dewford Island boat does not appear (at all) seeds. This bug seems to appear with the Roma Pokemon Emerald (U) (or not) slip. Lannette gives heart rock forever. When you start the game, when you first enter the first building, if you don't progress, go back to the exit. You are freeWalk the world without Pokémon. At some point, someone will tell you that May is in Fallorore and is actually Verdanturf. (Spoiler) Save your game before entering the 3rd floor of Devon Corp. Scream Joycewu33. Joycewu33.
