Xiaomi redmi note 9s update.

This story is constantly being updated... New updates will be added below... The original story (dated June 25) reads: These days, all smartphone manufacturers except Nokia offer their own custom OS on top of stock Android. We have ColorOS for Oppo, EMUI for Huawei, One UI for Samsung, MIUI for Xiaomi, etc. Each of these customizable skins offers users a unique user experience. Xiaomi's latest custom operating system, also known as MIUI 12, has brought several new features along with UI improvements. The list of features introduced in MIUI 12 includes: super wallpapers, dark mode 2.0, new animations, improved security features and more. MIUI 12 was first announced in April in China. Beta testing began shortly after the announcement. Then, a month later, Global MIUI 12 appeared on several devices. The first group of devices to receive the MIUI 12 update include the Mi 9, Mi 9T/Redmi K20 and Mi 9T Pro/Redmi K20 Pro. The remaining eligible devices are expected to receive the MIUI 12 update in the second phase, which will arrive in July. Xiaomi owners who have not received the MIUI 12 update on their devices are desperately waiting for it to arrive, as is the case with Redmi Note 9S users. Cut now, Xiaomi clarified the situation regarding the Note 9S MIUI 12 beta in the June update Q&A (the fix was released with the version number v11.0.9.0.QJWMIXM).

Regarding the MIUI 12 Pilot program for the Redmi Note 9S, Xiaomi announced: There is currently no Mi Pilot program for this device. Recruiting via MIUI 12Source may happen in the future. Let's hope that MIUI 12 Mi Pilot will start soon. FYI, we are tracking the MIUI 12 update for all Xiaomi phones (you can check it here). And of course, we will follow and inform you about all the developments related to the Redmi Note 9S Mi Pilot program. This story is constantly being updated... New updates will be added below... The original story (as of June 25) is as follows: Currently, all smartphone manufacturers except Nokia offer their own personalized operating system instead of Android. We have ColorOS for Oppo, EMUI for Huawei, One UI for Samsung, MIUI for Xiaomi, etc. Each of these personalized skins offers users a unique user interface. Xiaomi's latest customized operating system, also known as MIUI 12, introduced some new features along with UI improvements. The list of features introduced in MIUI 12 includes: Super wallpapers, Dark Mode 2.0, new animations, better security features and much more. MIUI 12 was first announced in April in China. Beta testing began shortly after the announcement. Then, a month later, the global version of MIUI 12 started hitting some devices. The first devices to receive the MIUI 12 update are the Mi 9, Mi 9T / Redmi K20 and Mi 9T Pro / Redmi K20 Pro. The remaining eligible devices are expected to receive the MIUI 12 update, which is expected in July. Xiaomi owners who have not received the MIUI 12 update on their devices are desperately waiting for it to arrive, just like Redmi Note 9S users. Still cutting. Xiaomi blew up the Note 9S MIUI 12 pilot in the Q&A section of the June update announcement (the patch that came out with version number v11.0.9.0.QJWMIXM). Regarding the MIUI 12 Pilot program for Redmi Note 9S, Xiaomi has stated the following: there is currently no Mi Pilot program for this device. Recruitment can be done in the same way in the future thanks to MIUI 12Source. Hopefully the MIUI 12 patch updates for Xiaomi, Redmi and POCO for 2-3 years after the device is launched. Monthly and quarterly security updates include Android security patches from Google, as well as fixes for specific issues from Xiaomi. On April 27, 2020, it introduced its latest Android skin, MIUI 12 Beta. A stable version of the operating system is currently available, which has been downloaded by several devices so far. However, there are still many Xiaomi phones that have yet to receive the new MIUI 12 update, including the Redmi Note 9S smartphone, also called Redmi Note 9 Pro in India. Xiaomi released the device on July 26th, 2020 and it comes with many amazing features. However, Redmi Note 9S users are still waiting for the new MIUI 12 update. According to a Mi Community moderator, there is no ETA for the device yet. Therefore, the moderator suggests that Redmi Note 9S users should select the device's MIUI 12 ROM in India to install the update. If you want to install the MIUI 12 update on your Redmi Note 9S smartphone, here we show you several ways to do it. All you have to do is scroll down and check the method that works for you. MIUI 12 is not yet available for Redmi Note 9S, the moderator says available. This information was provided by one of the Mi Community moderators. According to MOD users can use Redmi Note 9 Pro MIUI 12 India ROM. But if you don't want that, you can wait for the global release. Here's a brief description of what the moderator had to say about the update below: "There is currently no estimated time of arrival. You can unlock bootloader and flash Indian Fastboot ROM as suggested above, otherwise wait for global release. How to install MIUI 12 update on your REDMI Note 9S When you are ready to install MIUI 12 update on your Redmi Note 9S, you should note that there are two ways to do it. Let's do it step by step and see how we can install the update below. But before we get started on that, you need to unlock yourself first on your device. Find out how to do it below. Unlocking the bootloader Since it's nearly impossible to manually install an update or flash a ROM, it's important to unlock your device's bootloader first. You can do it by following the methods below: First, you need to download and extract Mi Unlock Tool on your computer. Next, open the Settings app on your device and find the About phone section. From there, enable developer options by tapping the MIUI version seven times. Then go to advanced settings and click on developer options. Then enable USB Debugging and OEM Unlock. Then find and select the Mi Unlock Status option under Developer Options. Then go to "Add account and device" to link your Mi account. Quick note Before proceeding, please note that you may receive an "Error 86012" error message. In this case, you should wait about a week before trying to link your account again. Otherwise, your account may be temporarily blocked. Additionally, you may receive the following error message: "Please connect to the network and try again." In this case, you just need to log out of the Mi account of the device. Then go to the Mi Unlock status page and log in directly from the "Add account and device" option. After successfully linking your Mi account, you will receive a welcome message with the text "Connected successfully". The Mi account is now linked to the device. Then reboot your device in Fastboot mode. You can do this by holding the power and volume down buttons at the same time. Then connect your Redmi Note 9S smartphone to your computer and open the already installed Mi Unlock Tool. Then sign in with your Mi Account ID. You should see the status "Phone connected". Then click "Unlock" to unlock the bootloader of Redmi Note 9S. One more quick note. Most likely, you will see the message "The current account is not associated with this device." If this happens, it means that you will need to repeat step five above. Now it's time to install the MIUI 12 update on the Redmi Note 9S smartphone. You can do it from the following link: Xiaomi Redmi Note 9 Pro India Stable Version V12.0.1.0.QJWINXM Download: Link Please note that the above download link is a recovery type and comes with MD5: 3429e721e1ac98fcdce606234e3e83a0. Also, as mentioned above, you will be able to install MIUI ROM on your Xiaomi device in two ways, including recovery and fastboot. The recovery method is done using the Updater application. As for the fastboot method, it is done using the Mi Flash tool. So, we will take it one by one and start the installation process. Method 1: Use the update tool to install the MIUI 12 update on Redmi Note 9S. Without wasting much time, here is how you can use the recovery method to install the MIUI 12 update on your Redmi Note 9S. file above? If so, you need to transfer the file to the internal storage of your Redmi device. Then open the Settings app on your device and look for "About phone". From there, go to System Updater (Updater app). A menu will appear in the upper right corner of the page. In case you don't know, the menu item has three dots. Click on it and select Update Package. Then select the downloaded MIUI 12 (Zip) file and click OK. And it's done! The MIUI 12 update will now be installed on your Redmi Note 9S smartphone. This method is also not recommended for downgrading. So if you are the kind of person who is moving from beta to stable, this may not work for you. Don't be discouraged by this, because the quick start method will work for you. Method 2: Using Flash

Tool to Install MIUI 12 Update on Redmi Note 9S The second method is called will guide you through the following steps to install the MIUI 12 update on Redmi Note 9S: First, restart your Redmi phone in fast boot mode by pressing and holding both the Power and Volume down buttons simultaneously. Connect Redmi Note 9S to the computer with Mi Flash Tool installed. Run the tool with administrator privileges. Then click "Refresh" to make sure the system recognizes the device. Then copy the path of the extracted ROM zip file and paste it in the Mi Flash Tool dialog. Now find and select the "Clear All" radio button in the lower right corner of the page. Then click the "Flash" button to continue. You will find it in the upper right corner next to the "Update" button. That's it! However, you have to wait for the status to change to Flash Done. In addition, the result will also show "Success". You are done installing the MIUI 12 update on your Redmi Note 9S. Wait for your smartphone to restart and then enjoy the new update. As for the worldwide rollout of the MIUI 12 update for Redmi Note 9S, we will keep an eye on Xiaomi for more information. As soon as we find something worth sharing, we'll let you know. She.
