PCDJ was the first to create a professional DJ software solution for computers back in 1998. The software was called the "Digital 1200s!" Since then we've continued to be a leading innovator in the DJ mixing software space, and we pride ourselves on keeping our ear to the ground. Much of what we implement into our software is of our own creative design (It certainly helps that our programmers are also DJs!), but just as much comes from user feedback. With over 80,000 users of our DJ mixing software globally, it's a great community to poll. Mix Music, Music Videos And Host Karaoke With DEX 3 Our flagship software, PCDJ DEX 3, is versatile DJ mixing software with the ability to truly "Mix Everything". Offering media playback for almost any file type, it swiftly mixes music, music videos and even does karaoke -- so a true all-in-one DJ mixing software solution for the professional entertainer that wants to offer the total multimedia experience to their patrons or clients. With over 90 DJ controllers now supported (zero-configure) you have options from every major DJ equipment manufacturer, in many styles, to use with PCDJ. We also offer our customers free updates for the life of the product with their software purchase, and activation on up to three computers per license key. We feel the best way to find out if our DJ mixing software solutions meet your requirements is to download one of our free DJ mixing software demos. VirtualDJ is something you can try very easily.
