Android 7, which bears the delicious Nougat codename, is out and it offers split-screen views and more interactive notifications. As exciting as that is, you may need some help getting it onto your device and learning how to make the most of its new features. With our guides for getting the update onto Nexus devices, splitting your screen and mirroring Chrome and other apps, you'll quickly become nimble in Nougat.Image Credit: Asif Islam/Shutterstock**Android 7 Nougat Tips** Source: Joe Maring / Android Central WhatsApp's latest features show up in the beta app a month before they're rolled out to the general public. If you want to be the first to try out the latest WhatsApp features, here's how to download the WhatsApp beta app. Products used in this guide Level up: Google Pixel 3a XL (\$420 at Amazon) Usually, it takes about a month for a new feature to make its way from the beta client over to the public build. That was the case with the dark mode, and any new feature or UI change that WhatsApp is planning on rolling out will make its way to the beta channel first. If you're unwilling to wait for a particular feature to go live in the public channel, you can always download the beta app. WhatsApp runs an official beta program on the Play Store, but that has been full for over a year and isn't taking new beta testers. Your best option instead is to sideload the latest beta APK and install the app. I'll show you how to do that below, but before you start you will have to back up your WhatsApp messages and media so that if something untoward occurs, you don't lose your chats. Backed up your messages to Google Drive? Here's how you can sideload the latest WhatsApp for Android beta: Open Google Chrome or any web browser on your phone. Type apkmirror.com. Hit the Search box on the top right corner. Source: Harish Jonnalagadda / Android Central Type WhatsApp beta and hit go. Tap the Download button next to the WhatsApp Messenger beta listing. In the Download section, select the build number once again. Source: Harish Jonnalagadda / Android Central Tap Download APK to begin the download. Tap OK in the dialog box to let Chrome download the file. Tap Open. Source: Harish Jonnalagadda / Android Central You'll need to allow Chrome to install apps. Tap Settings to get started. Toggle Allow from this source to On to continue the installation. Tap Install to install the latest version of WhatsApp beta. Source: Harish Jonnalagadda / Android Central Once you're done installing WhatsApp, make sure you disable the setting that allows Chrome to install unknown apps. Go to Settings -> Apps & notifications -> Special app access -> Install unknown apps -> Chrome -> Toggle the setting to off. If you ever feel like you don't want to be on the beta channel, all you need to do is uninstall the app and just download the official WhatsApp client from the Play Store. The mid-range camera king The Pixel 3a XL has a lot going for it, but its defining feature is the camera at the back. Google has somehow managed to offer a flagship-class camera on a phone that costs half as much as high-end phones, making the 3a XL a fantastic bargain. Android updates its operating system regularly to include new features, fix glitches, and make your Android device run more smoothly. The newest version is Android 10, and it offers some great features you'll want to get your hands on. Installing the new OS is not too difficult. Before you install it, you have to make sure your phone is compatible with it and able to receive the latest update, which we can help you with. Then, we'll give you some advice about getting the update. Make sure you have the right phone Julian Chokkattu/Digital Trends Unfortunately, not every Android phone is going to be eligible for the Android 10 update. If your device is over 2 years old, has already received two major Android OS updates, or is a lower-end budget device, you might not be seeing Android 10 at all. We've collected rumors for each of the manufacturers in our Android 10 updates post, so you can check there for the latest news on a variety of devices. However, there are some devices which are a given. All of Google's Pixel phones have already received the update, while the latest flagship phones — like the Samsung Galaxy Note 10 range and Huawei's P30 range — are also highly likely to get the update. You can also safely assume any phone that took part in the Android 10 beta is likely to receive the update. The Android 10 beta program was the largest in Android's history, with an amazing 25 devices from 13 manufacturers taking part. Here's the list of phones that supported the Android 10 beta: Asus ZenFone 5Z Essential Phone Huawei Mate 20 Pro LG G8 ThinQ Nokia 8.1 OnePlus 7 Pro OnePlus 7 OnePlus 6T Oppo Reno Realme 3 Pro Sony Xperia XZ3 Tecno Spark 3 Pro Vivo X27 Vivo Nex 5 Vivo Nex A Xiaomi Mi 9 Xiaomi Mi Mix 3 5G Google Pixel 3a Google Pixel 3a XL Google Pixel 3 Google Pixel 3 XL Google Pixel 2 Google Pixel 2 XL Google Pixel Google Pixel XL Back up your data While the final Android 10 build won't be as risky as getting involved in a beta program, it's still a really good idea to backup your Android devices regularly and before committing to the upgrade. Make sure to back up your Android phone to your PC to make sure your precious data is as safe as houses. How to install Android 10 So your phone has been confirmed to be getting the Android 10 update — hurrah! Now what? Well, you may have to wait a while. Some manufacturers take a little while to push the update out, whether it's the speedier companies like Nokia, or the slowpokes of Samsung and LG. That usually comes down to how much work they have to do, and creating manufacturer UIs like Samsung's upcoming One UI 2.0 can take a significant amount of time. Thankfully, when your update is ready, it'll be pushed through to your phone and you'll be prompted to upgrade. You can either upgrade right then and there, or you can choose to have your phone install it at a later time when it's more convenient — you can even have it update overnight. If you're really, really excited about it (like us) then you can manually check to see if the update has come in. To do so, head to Settings > System > Advanced > System update > Check for update. If you're not using a stock Android phone, then your path to finding the updates section may be slightly different — for instance on Samsung phones, you can access Software update directly from the Settings app — but its almost always somewhere in your Settings. That's really all there is to updating to Android 10. Unsure of what's new in the operating system? Check out our Android 10 review. Editors' Recommendations Android smartphone owners can now download a free Skype client from the Android Market that will let them make voice calls over mobile data or Wi-Fi connections — except in the U.S., where it will work over Wi-Fi only.With the new application, smartphone users can make free Skype-to-Skype calls, unless their network operator makes additional charges for data usage. The app will also allow them to communicate using instant messaging and make calls to regular phones for a fee. The app works on smartphones running Android version 2.1 or 2.2. Skype tested it on HTC's Desire and Legend phones, Google's Nexus One, and Motorola's Milestone and Milestone XT710. The application may also work on other Android phones, Skype said, but it won't guarantee full functionality or compatibility. It is aware of some problems with the app on the Samsung Galaxy S, which it will address in the future, it said.Users that have already created a Skype account on a computer will see their full contact list when they sign in to Skype on their Android phone.The app can downloaded from the Android Market, except in China or Japan, or by directly accessing skype.com/m from a compatible smartphone, Skype said. The company didn't say why U.S. users are only allowed to use Wi-Fi to make Skype calls. Send news tips and comments to [mikael\\_ricknas@igf.com](mailto:mikael_ricknas@igf.com)
