Click to open the Chrome browser. Version code: 127, Armeabi-V7A architecture, Android 9+ secure installation with guarantees, no ads or additional malwareknown device. This can include any accounts created by installed apps. Personal information Read contacts: • allows the app to read data about contacts stored on your device, including how often you call, send emails, mail or otherwise communicate with specific people. This permission allows apps to store contact information and malware can share contact information without your knowledge. Location: Approximate location (by network). • Allows the app to determine your approximate location. This location is determined by location services using network location sources such as cell towers and Wi-Fi. These location services must be enabled and available on your device for the app to use them. Apps can use this to determine your approximate location.

Messages: read text messages (SMS or MMS); • Allows the application to read SMS messages stored on the device or on the SIM card. This allows the app to read all SMS messages, regardless of their content or sensitivity. Phone calls: Direct calls to phone numbers: • allows the app to call phone numbers without you having to do anything. This may result in unexpected charges or calls. Note that this prevents the app from calling emergency numbers. Malware can cost you money if they call without your approval. Read phone status and identity: • Allows the app to access the device's phone features. This permission allows the application to determine the phone number and device ID if the call is active and the remote number associated with the call. Other: Read call log: • Allows the app to read your device's call log, including details of incoming and outgoing calls. This permission allows apps to store call log data and malware to share call log data without your knowledge. Storage: Edit or delete the contents of the USB stick: • Allows the program to be written to the USB stick. Read USB stick: • Allows the program to read files from your USB memory.

Camera: Photo and Video: Allows you to photograph and video with the camera. With this permission, the program can use the camera at any time without your approval. Network: See Wi-Fi Connector: â A â A â A â 'â â 'â 'â 'r. The browser and other applications provide tools for sending data to the Internet, such as FI and replacement points on the Wi-Fi network device configuration. Change the network connection: € allows the program to change the network connection status. Display Network Connections: â RS âcilate to display information on network information on showing the network connection because B, which networks are connected. Get data from the Internet: "Let the programs take the cloud messages to the program sent to the app for the program. The data will be used through this service. Devil programs can cause too much data use data. Battery effect: Vibration Control: â allows the program to test the vibrator. Eliminate the device's stop: € allows the application to prevent the device from stopping.
