To change the new iPhone wallpaper, you can just select any photo from the camera album and set it as the new iPhone wallpaper directly. It's even easier. We will go into detail as follows. Tap to open the Photos app on iPhone with the latest iOS. Browse through your iPhone's Camera Roll to find your favorite photo to use as your new iPhone wallpaper. Tap to select it and view it in the Photos app. In the lower left corner you will find the share button. Click the Share button, then click Next in the upper right corner. You will see sharing options as below. If you swipe from right to left at the bottom of your iPhone screen, you will see the "Set as wallpaper" option. By tapping on it, you can move and resize the selected photo and then set it as your iPhone lock screen wallpaper, home screen wallpaper or both. In a Finder window or on your desktop, find the image file that you want to use as your new iPhone wallpaper. Tap to select it and view it in the Photos app. In the lower left corner you will find the share button. Tap the share button, then tap More in the upper right corner to see the following sharing options. Swipe from right to left at the bottom of the iPhone screen to open the Use as Wallpaper option. Tap it and you'll be able to move and scale the selected photo, then set it as your iPhone's lock screen wallpaper, home screen, or both. In the Finder window or on the desktop, locate the desired image file you want to use. Control-click (or right-click) the file, and then select Set Desktop Picture from the context menu. If you are using multiple displays, only the main display's background image will change. If you don't see Set Desktop Picture in the context menu, you should see the Services submenu instead. From there, select Set Desktop Picture. In Windows 10, go to Start. Type "Background" and then choose Background Settings from the menu. You can see a preview image in the background settings. The Background section contains a drop-down list. Select Image and then select or Browse to view the image. Choose Monochrome, then choose a color. Select "Slideshow" and navigate to the images folder. Under Select a Match, choose an option such as Fill or Center. Windows 7 Right-click on an empty area of the desktop and select Personalize. The panel personalization panel appears. Click Desktop Background in the lower-left corner of the window. Click any image and Windows 7 quickly places it on the desktop background. did you find a guardian Click the Save Changes button to save them to your desktop. If not, click the Image Location menu to see other options. Or, if you're still looking, continue to the next step. Click the browse button and then click a file in your personal Pictures folder. Most people store their digital photos in a picture folder or library. Click Save Changes and close the desktop background window when you are happy with your choices. Quit the program and the selected photo will remain as the background on the desktop. Clock apps were one of the first apps available. Finally, smartphones are great for telling the time. You always have it with you. Telephones have evolved a lot. There are also clock apps, but not that many. They are still great ways to tell the time. Here are the best clock apps and clock widgets for Android! There are many types of clock apps. Let's try to join asvarity if possible. We would also like to highlight Beautiful Widgets. It hasn't been updated in years, but it's one of the most unique and customizable clock widget apps we've seen. Best clock apps and clock widgets for Android! The weather is not what you usually think of when you think of clock apps. Still, IWeather is one of the best clock and weather widgets we've ever seen. It is neutral and customizable. It should work with most phone themes. The widget is also quite modern. The app is also a very good weather app. It does the usual stuff like displaying forecasts, current weather, and radar. All app features are free. If you want, you can pay \$1.99 to remove the ad. See also: The best weather apps and weather widgets for Android Sleepy alarm clock is not a surprise app. This is an alarm clock app for people who have trouble falling asleep. Allows you to set multiple alarms. Each alarm can have its own user settings. It also supports Android Wear, location based alerts and more. They also have delay puzzles. Basically you have to wake up and solve the puzzle before the alarm goes off. You can download the program for free. The Pro version will set you back just under \$1.99. Alarm Clock is one of the best clock apps for me. You can set an unlimited number of alarms. It also has other basic features such as a sleep timer. Some of the more unique features include nightstand mode so you can use your phone or tablet as a digital bedside clock. In addition, there are several themes, weather information, brightness slider, flash toggle and more. What makes it great is that you can use it at night for pretty much anything you'll need at night. \$0.99 in-app purchase removes ads. Everything else is free. See also: How to set an alarm on Apple Watch. Price: Free / Up to \$4.99 Xtreme Alarm Clock is another of the best alarm clock app. There are different alarm clocks. Includes music, crescendo alarm and more. It also has a very large snooze button in case you're not ready to wake up. The app also has math problems to try and wake you up during your alarm. It also has a timer, simple sleep tracking, and more. You can get rid of the ads by purchasing the professional version. He is an all-around strong performer in this space. Joe Hindy / Android Authority Digital Clock by Panagot is a simple and effective digital clock app. It displays various time elements and you can use several different time and date formats, colors and watch faces. It does not have an alarm function or anything like that. However, the application size is a tiny 0.1 MB, so this is also the lightest solution. The app is completely free with no in-app purchases or ads. Clock widgets are hard to find these days. However, Lazar Dimitrov's digital clock widget is modern and decent. This is a simple home screen clock widget. It shows the time, date, battery and a very brief overview of the weather. Widgets are highly customizable and available in different sizes. It should work for most home screens and themes. The name contains the word Xperia. However, it worked great on all of our test devices, none of which are Sony devices. This is definitely one of the best watch apps. See also: Best Clock Widgets for Android and Clock Widgets with Weather Google Clock is perhaps the most stable clock app. It can do all the basic things you would expect from a watch app. Includes stopwatch, timer, clock and alarm clock. Setting an alarm is easy. Both the stopwatch and the timer are very easy to use. The application also has a material design. However, it looks and works amazing. There's also support for Android Wear and a world clock feature. Not many features. However, it helps to keep the application lightweight. It's a good choice who just need a simple clock app. Price: Free / up to \$7.49. Huge Digital Clock is a pretty basic clock app. Displays a large digital clock on your device screen. That's all he does. You can also view the day of the week and the calendar date, and switch between 12-hour and 24-hour time format. There is also a function to change the color and hide the status bar for the full immersive effect. Of course, you can have the clock move across the screen to prevent burn-in, and even show the weather. It does not strain the eyes and works exactly as described. See Also: Best Alarm Clock Apps For Android KWGT is a tool for creating custom widgets. There are some good clock widgets and clock apps for Android. However, sometimes it is better to create your own. KWGT allows you to do just that. It comes with various tools, themes, and features to customize it to your needs. A little difficult at first. However, the results speak for themselves. It's a favorite of themes and modders because it instantly gives you the look you want. The Pro version costs \$4.49. The same developer also makes KLWP, a live wallpaper app that can also add an animated clock wallpaper to your home screen. You can also use KWGT for free with Google Play Pass if you use this service. Also see: Best customization apps for Android Price: Free / \$3.99 per month / \$12.99 per year Transparent Clock and Weather is a trending clock and weather widget. Transparent widgets have the distinct advantage that they work with almost any wallpaper or theme on your device, so it's good to have a good widget. Widgets look good and fit well. It's basically a weather app. It includes the usual stuff like forecasts and radar, although you'll have to pay for a subscription to get most of the features. It's not cheap, so we really only recommend it as a widget, but some people don't like the weather half as much. If we missed any great clock apps, let us know in the comments.
