**Rehabilitation and Reintegration For Sustainability: Desired Home cum Training Center Culture**

**Skill Development in India**

Skills and knowledge are the driving forces of economic growth and social development for any country. Countries with higher and better levels of skills adjust more effectively to the challenges and opportunities of world of work. In India, the workforce in 15-59 age bracket is on the rise. It is important to impart skills to this workforce to get employed and help in economic growth of the country and would provide an opportunity to achieve inclusion and productivity within the country and also a reduction in the global skill shortages. It is also important that the policies of skill development be linked to policies in the economic, employment and social development areas.

A task of skill development has many challenges which include -

- a) Increasing capacity & capability of existing system to ensure equitable access to all.
- b) Promoting lifelong learning, maintaining quality and relevance, according to changing requirement particularly of emerging knowledge economy.
- c) Creating effective convergence between school education, various skill development efforts of government and between government and Private Sector initiative.
- d) Capacity building of institutions for planning, quality assurance and involvement of stake holders.
- e) Creating institutional mechanism for research development quality assurance, examinations & certification, affiliations and accreditation.
- f) Increasing participation of stakeholders, mobilizing adequate investment for financing skill development, attaining sustainability by strengthening physical and intellectual resources.

India has target of creating 500 million skilled workers by 2022. National Vocational Qualification Framework (NVQF) will provide quality assured various learning pathways having standards, comparable with any international qualification framework and will permit individuals to accumulate their knowledge and skills, and convert them through testing and certification into higher diploma and degrees. Partnerships will be continuously promoted between Government, industry, local government, civil society institutions and all potential skill providers. Availability of public institutions above the high school level, after class hours for skill development by the Private Sector, without disturbing the normal working, will be explored. The Government would aim at useful public-private partnerships. The States being the key actors in Skill Development would set up overarching umbrella for action for Skill Development through State level Skill Development Missions. National Skill Development Corporation will support private skill development initiatives. The enabling infrastructure for large number of fiscal agencies needs to be built that includes modification to the Apprentices Act, 1961.

**Institutional Arrangements**

- 1) Prime Minister's National Council on Skill Development
- 2) National Skill Development Co-ordination Board
- 3) National Skill Development Corporation

It is a non-profit company under the Companies Act 1956 with an appropriate governance structure. Establishment of a well structured sector specific Labour Market Information System (LMIS) to assist planning and delivery of training. Participation in affiliation, accreditation, examinations and certification.

School education would be strengthened to reduce the school drop outs. The quality of school education will influence the effectiveness of skill development programme as a whole. Quality and relevance of skill development are key to India's global competitiveness as well as improving an individual's access to decent employment.

Occupational patterns are changing, new jobs and job titles, job enlargement, job enrichment, and new flexible work arrangements are emerging. Employment demands are shifting towards higher skill categories. Knowledge professionals will need support from middle-skilled workers in new knowledge and technology areas. The skill development system will need to meet this challenge. The response time is limited as the rate of change is high and accelerating. Research will be a key strategy for managing change and learning from it.

Importance of skill development in india. Articles on skill development in india pdf.

The industry's leaders have often labeled the lack of conformity between what is taught in the classrooms and what the industry requires. A machine can teach and give information, but we still require teachers to adapt the information for better understanding. It merges learning in the classroom with industrial experiences and foreseen students who spend considerable time employed in the industry as full-time workers, instead of interns, as part of their curriculum. ED-TECH tools in formal education configurations can help reduce the cost of education by reducing recurrent expenses. It's time for us to have to rest one another and, between Sä, "says Alka Kapur, Director, Modern Public School (Shalimar Bagh)." A person around the world, who is doing part of it in helping those in need during these difficult times, deserves our greatest respect. The machine can only provide data, but we need a human to provide the emotional touch when it comes to interacting with other people. According to an evaluation carried out by the National Sample Survey Office, the unemployment rate of India was from a maximum forty-five years of 6.1% in the year 2018. To address the skill gap, The Government of India had established a Ministry of Skills Development and Entrepreneurial Spirit (MSDE) and schemes under its Pradhan Mantri Kaushal Vikas Yojana (PMKVY), Indian skill, Sankalp and missy development of national talents, etc. . It can be inspired by European countries, such as Germany, where the workforce has been able to recover the exceptional operating benefits of digital manufacture by offering an incomparable example worldwide. A disclaimer: Expressed in the previous article are those of the authors' and they do not necessarily represent or reflect the opinions of this publisher Page 2 in the final season of the popular series' person of interest' of the center; hub. From the show, a supercomputer called 'La Macchina' performs several scenarios and possible results for a developing situation. The benefits of these cost savings can be transmitted to the end users in the form of more affordable and quality education. With the correct training techniques and L & D, this can be a blessing for the workforce. The educational system in India is often found in the midst of a storm of debate on its lower quality of learning, outdated curriculum, improperly in the learning of routes and the lack of adequate infrastructure. The country was already recovering under the economic deceleration when the Covid pandemic hit. There is a need for the creation of employment and the entrepreneurship of women in the key initiatives of the Government. With rapid technological development, many jobs are being automated. To say that India is not capitalized on its highly acclaimed "dividend demographic" would not be incorrect. In the future, this ability can be improved more with the help of technologies such as Big Data, Analytics and AI. Features such as tests, games, badges, headboards can be used to make learning more rewarding. In India, a well-known automobile manufacturing company planted a machine for every 4 workers. The National Committee for the Integration of Vocational Education (NCIVE), will be constituted by MHRD, which consists of experts in vocational education and representatives of ministries and industries, to supervise efforts. We must use this opportunity to reconstruct us rationally and rationally with greater impulse. The technical collaboration with countries developed as the United Kingdom, Australia and EAUs can be useful for comparative evaluation and mutual recognition of standards, in addition to increasing mobility of Indian workers of blue and white neck. One can not underestimate the role of humanistic skills, including the resolution of creative and critical problems, interpersonal skills and leadership skills to sail navigate This complex transition. End of the art Being the second most populated country in the world after China, India faces the massive challenge of providing food, housing and employment to its citizens. Approach areas for vocational education will be chosen in function of skills and mapping of local opportunities. Although it is unlikely that it replaces traditional formal learning models, both can coexist in tandem to improve the quality and accessibility of the University of Adamas, the University of the Private Sector based in Kolkata, according to the state government. The SPLICA to expand assistance to its emergency aid fund, whether in cash or in kind, has offered a large part of its Barasat campus to establish a temporary hospital. The trip to the development of skills must begin from the level of primary education onwards. Government political policies, governmental policies, such as skill, India and digital India focus on cultivating a digital literacy atmosphere and skills-based education. Women currently have only 20 percent of companies in India. India's associated trade and industry chambers report that simply 20% of five million students who gradually grad themselves in India. This accessibility has given a wide range of options for online learning for the young demotions, which allows them to take advantage of the electronic learning modules to continue courses of their interest without interrupting their lives or incurring enormous debts. The objective is to allow the hiring of students through a pre-placement project and is expected to quickly help the career trajectory of the Students of II Madras. The Association with Maggenome Technologies also It will focus on other magnal nanoparticle applications in the next future to provide solutions in diagnostic areas, therapies and environmental remedy. The Department of Biotechnology of IIT Madras, headed by Prof D D He will be in charge of this collaboration that seeks to direct students towards a rapid path of the race. Together, joining the hands against the threat of Covid-19, we can save the world, "added Alka Kapur. If he saw himself through a different perspective, only certain characteristics of these works are being replaced . Politycity aims to expose at least 50% of students from schools and education institutions superior to vocational

education for 2025. In alignment with the objective of sustainable development 4, which aims to "provide quality education inclusive and equitable and promote opportunities for lifelong learning for all", the NEP 2020 intends to make the maximum potential of the Indian Demographic Dividend. In a severe labor crisis on the market today, Automated jobs come as somber news for many people. Another example is the call centers. The way forward is progress, it is likely that the educational sector is subject to a transformation without precedents that will be marked by the following tendencies: A hybrid education models, the convergence of traditional brick and mortar classrooms and online learning will be complete and without problems. Similarly, a counselor requires empathy and emotions to interact with its customers, a feeder that will be difficult to achieve with machines. Therefore, he must create millions of jobs each year to obtain the advantage of this demographic dividend. As everything else is on our lives, more and more educational institutes are warming up to the idea of embracing ED-TECH tools to build a futures education system. The distance between a probable future and a possible future is always shortened by resilience and determination. The previous figure is based on 2019 "India Skills Report" by Wheebox, strong people and CII, which establish that only 46% of Indian students are employable. On the other hand, the slow project aims to improve the relevance and efficiency of skills. However, provided through the industrial training institutes (ITIS) and learning. However, the road ahead may not be as smooth as it responds. Buddi Health is a deep learning platform based on the US-based cloud. UU for health. These collaborations were facilitated under a novel concept called "Excellence in Dual Education of Engineering" (Tidee) initiated by IIT Madras. It uses complex algorithms, but it fails miserably because there is no good result. Fortunately, the Indian government has undertaken numerous initiatives for the development of skills. For this regard, the new National Policy of Education 2020 (NPE) has the intention of presenting a complete review of the India's educational system. The collaboration of multiple stakeholders is essential if we must build a greater synergy in the initiatives, deepen the knowledge group of skills and facilitate the creation of institutional knowledge and capacity. The NEP 2020 aims to integrate vocational education into general education in a gradual way by the creation of a national outpatient qualification framework (NHQF), which will be coordinated with the National Skill Qualification Framework (NSQF) for Facilitate mobility between currents. The works that require human interaction, such as infirmary, bartending, counseling, can not be automated. Although this loss has been reduced to 100.3 million in May 2020 to 29.9 million in June 2020 and now only 11 million in July 2020, it is still a situation of horrifying. However, NEP 2020 is definitely a correct step towards the correct direction, it must be based on solid structural changes in the current learning ecosystem to guarantee the holistic development of students. While automation Help make decisions, can not replace the jobs that require critical thinking, intuitive decision making or innovation and creativity. This initiative will expose students to real-time developments and technological needs of the industry. Industry Associate Dean (Industrial Consulting and Sponsored Investigation), IIT Madras, signed the MOUS with RAM, Executive Director, Buddi Health, in the presence of Prof B Ravindran, Head, Robert Bosch Center for the science of data and artificial intelligence (RBC DSAI) and Prof Rajesh Nair, coordinator, Tedee, IIT Madras, and also with Dr. CN Ramchand, Executive Director, Maggenome Technologies. As for these collaborations, Prof. Rajesh Nair, coordinator, Tedee, IIT Madras, said: "This need. The alliance based on an exchange of knowledge focused and, ultimately, lead to more professional growth I ask for researchers. Both MOUS come with scholarships on par with the remuneration of junior-level engineers. They have installed 5000 machines so far, which replaces more than 20,000 workers. It can also be organized An emergency hospital of 1000 beds. In this area. On the occasion, said the chancellor, said the Samit Ray, "now, the situation is very critical. Electronic learning modules will be used to complement formal education through e-tutorials, live projects, group discussions, training after schools and online internships. According to a Bloomberg economic article and its projections, India GDP will grow from \$ 2.7 billion in 2019 to \$ 5 billion by 2025 and \$ 8.4 billion in 2030. Fundamentals for an effective, efficient and sustainable skills development ecosystem They had been established on the last year, however, it is time to build on it. We are all ready to face the situation together. "With social responsibility, it is one of the fundamental values of the University, Adamas has taken proactive measures to protect staff and partners, and communities where it is located. In addition to contributing to the economy, the business spirit of the Women too Tangible social outcomes in terms of improved education and health. Exploration of associations from the academic industry is necessary to achieve tangible results, as well as Building and relevance and quality of skill training. The introduction of new subjects, the ED-TECH tools, will also be used to introduce new disciplines, such as cloud computing, digital marketing, data science, artificial intelligence and automatic learning. As well as offbeat curricula, such as cybernetic law, forensic, culinary management. To help create a crop of young professionals ready for futures. Apart from that, it has the provision of providing hostel facilities for 600 nurses. In the last instance, the human decision becomes necessary. The industry 4.0 is no longer a speculation but a reality. Under the flagship Pradhan Mantri Kaushal Yojana, the government has given skill training to 6.9 million people since 2016. The Budget of the Union 2020-21 also takes knowledge of this aspect and emphasizes that the National Development Agency Skill, the nodal agency in India, will give a special impulse to the opportunities for skill development focused on infrastructure. The recognition of previous learning (RPL) is necessary to address this problem. If we achieve it or not, it depends on how we will automatically automatically and how effectively we eliminate the causes of interruptions. Today, online learning goes beyond K-12 and formal upper education and extends to non-academic courses, preparation for competitive exams and professional increase. The growth impellers of ED-TECH tools are being incorporated into formal learning systems in a rapid. The rhythm, and this change can be attributed to the following factors: the penetration of smart phone and Internet. The penetration of smart phone in the Indian market, along with affiliated and affordable mobile data services, has opened Horizons for electronic learning in the country. The development of skills will also prepare the workforce for industry 4.0 driven by increasing urbanization, ubiquitous Internet connectivity and the proliferation of emerging technologies. But on the other side, it also creates new opportunities for That is creative and it is likely that cognitive nature is replaced by automation in the future. Today, parents spend anywhere between RS 50,000 to RS 1 Lakh per year for primary education in private schools. All staff members, including teachers, donated a salary of a day and alka Kapur, director, modern public school (Shalimar Bagh) donated RS 2 Lakh from his own savings. "It is our humble contribution to the fight with the crisis From Crown. Apart from contributing 10 Lakhs to the Relief Fund, the Chancellor has proposed to offer a huge area within its campus to establish a temporary hospital by the Government to treat patients affected by the crown virus. Located Strate Gothically on the Barrackpur road - Barasat Road in Jagannathpur, this campus can be tied to the North 24 Pargana needs. The pandemic has completely interrupted the economic outlook of the nation. According to the South Economic Focus report of southern Asia. Asia, the work population of India (over the age of 15 years) is expanding by approximately 1.3 million per month during 2015-2025. Every year, about 28 mi Clones of young people are added to the workforce of India. Even as our formal education configuration continues to follow the co-model brick and mortar model, e-learning is to find a way in our classroom throughout the board. Supplemental schemes within the National Education Policy, such as E-En Especially, E-Education, Swayam that promotes MOOC-based curriculum high school, NAND GHARS that are based on the use of digital tools for teaching, and the India online skills, a portal for online skill training, all encourage increasing traditional learning in the classroom with Ed-Tech tools. There is a greater need for work Upper higher level, especially since most Junior level work is automated. According to a study, less than 30 percent of the nurse's work can be automated and the number is unlikely to change the number in the future. Make our juvenile future ready is a call that I can not get lost! The opinions expressed above are the author's own. We all need to help the government by providing financing or infrastructure. According to the Chancellor's proposal, the Prof Samit Ray, the campus can accommodate at least 30 doctors with their families. A Bain & Co research had predicted that encouraging women entrepreneurship can increase direct employment by 50 million to 60 million people, and increase indirect and induced employment of another 100 million to 110 million people by 2030. From now on, all the offices of Adamas are closed, with the staff working through virtual and digital platforms. Page 5 Kiti World School Delhi and Gurgaon, teaching staff and did not teach, contribute a salary from one day to the Fund of Relief of the Prime Minister to treat the Coronavirus (Covid-19). Kiti World School located in Pitampura Delhi and SEC 46 Gurgaon and Sohna Road Gurgaon. Secondary schools will collaborate with ITIS, political policies, local industries, etc. To integrate vocational education into the educational offers of secondary schools. The collaboration with Buddha's medical attention technologies is to develop artificial intelligence software products for the health industry, respectively. Maggenome Technologies is a start of Nano-biotechnology based in Chennai that focuses on the development of magnatic nanoparticle technologies for their application in the science of life. Chemical, pharmaceutical and engineering industries. A Gamified learning: Making learning is more attractive and interesting for students, you can take advantage of ED-TECH tools to introduce an element of informal education of gamification. The information asymmetry is among the most important challenges of skill development, a person You may be aware of your skills unlike your potential employer, this is automatically basic for your salaries and results in underemployment. Introduction of vocational subjects, collaboration of the academic industry and A @ness in the practical formation are the Forward. The policy has planned the exposure of vocational skills from the average and secondary qualification through opportunities for internships with indigenous artisans, artisans and blue-collar professionals. Trends and projections are according to a KPMG report, the E-Learning market in India comprised 1.6 million users and was worth \$ 247 million in 2016. For example, while stores are being replaced For online delivery services, there is a requirement for delivery personnel to ensure that the products reach the right place. The machines, unlike humans, can not plan or bring an emotional touch to the daily routine. The task is a herming but not impossible. The figures released by the National Sample Survey Office in 2015 placed the increase in the cost of education by 175 percent. While we have a fuss of Premier Institutes, such as IIS, IIMS and AIIMS, to boast of in the field of superior education, the general robustness of our education system remains suspicious. As teachers, we have to establish an example for each countryman to think about doing part of it towards this fight. It is expected that the number of Internet users in the country touch 730 million this year. People require a skill image change to get an edge on the robots. A collaborative learning, ED-TECH tools will also help promote a collaborative learning atmosphere through a model equal as well as the exchange of notes, the exchange of ideas and ideas through s from a common portal. Learning accustomed to the greatest advantage of e- the learning tools are their ability to adapt the curricula according to the performance, skills and objectives of each student. At least 375 million people will be displaced at the level And they will have to change their occupation and / or acquire new skills. The traditional work methods have changed and the human workforce is quickly replaced by machines. A report from economic times placed the mobile subscriptions of India to 1,200 million in However, this change must be taken as not a replacement but an extension. We live at unprecedented moments when industries and trade are fighting a battle to remain afloat and survive the crisis. A alequity of a decent formal education in India is not cheap. It is expected that the study projects that this market size record an eight-time growth in a period of five years, reaching 9.6 million users and a net value of \$ 1.96 billion for 2021. viewA € pdfvolume 28 , Number 4, December 2016, pages 235-243https://di.org/10.1016/j.iimb.2016.10.003 National Skills Development Policy Education and training India is relatively a more young nation in Comparison with your neighbors. India must analyze the creation of a framework to institutionalize the development of skills and vocational education within the school system. Ed-Tech has a lot of promise to transform our traditional models of education. Upskilling and Reskilling employees are the answer here. Creative thinking, planning and analysis, critical thinking and effective communication are more important in today's market. The two proposed initiatives, namely the acquisition of skills and knowledge of knowledge of sustenance skills (Sankalp) and strengthening skills for the improvement of industrial value (Ighit) will increase a long way to reinforce the Perspectives for skill development in the country. A Sankalp is a program oriented to the Ministry of Skills Development with a special approach in decentralized planning and improvement. In India, NSDCs have incubated in sectoral skills (SSCS) tips to encourage a connection with the industry and design a curriculum aligned with the demands of the industry. A A e. From the third approach, the issue of low female participation should be addressed in the workforce. The school raised an amount of RS 4 Lakh and the same has been given at the bottom of PM Clesses. This growth rate puts us as the second largest, big. Market in the world, after us. These figures are a testimony of the growing acceptance towards ED-TECH and a provision to embrace these tools to increase the quality of education. Superior education, especially professional titles in fields such as engineering and medicine, is much more exorbitant. In addition, life learning will be immensely important in the construction of resilience and will remain relevant in the fast era. There is an urgent need to renew the school curriculum and include the education of skills unlike keeping it focused on the learning of routes. Superior education institutions will offer vocational education in association with industry organizations and civil society. Another aspect that can not be overlooked is the international comparative evaluation. Page 7 Looking at the problems faced by the Coronavirus pandemic, the director and staff of the Modern Public School Shalimar Bagh decided to extend a help of the government. Surveys indicate that 93 percent of employers who want employees who have good communication skills, are adaptable and can think critically about those with superior academic records. These figures will surely have been expanded more in the last five years. However, despite these schemes and according to a report of 2016 by the Labor Office, around 58% of unemployed graduates and 62% of subsequent graduates have mentioned ", the availability of jobs that coincide with their ability and education "as the main reason for its unemployment. It is easier to connect and interact with a human that a bot in a chatbox. "The IT sector also employs almost 4.1 million people and care focuses on new technological skills. Around 250 employees are working The educational institution of Kiti.neelima Kamrah, Director, Kiti World School said: "At this moment, when our country is fighting with the pandemic of Coronavirus, in the effort to save our city and citizens of this pandemic, we would like to donate Our salary from one day a To the Relief Funds of COVID-19 for immediate help that may be necessary for the treatment of Covid-19 in hospitals. " The Indian Institute of Madras Technology will collaborate with two industry partners for artificial intelligence research and magnetic nanoparticles. Products. The Institute has joined Maggenome technologies to develop products based a €
