The discretion can mean several different concepts in the business environment. The dictionary gives two different definitions, which applies to the art of being discrete and another that refers to having the ability to make a judgment, a choice or a responsible decision. All these apply in the world of business, where executives can have the discretion of spending money, discretion to put their business for sale, or the discretion of not saying to the media on the difficulties of company personnel. The importance of the discretion for the reputation of a company can not be exaggerated. Most companies require that employees are discrete in their commercial communications. They hope that employees discover what information can be shared freely, both internally and externally, and to be discreet about what they say to others. Written communications such as e-mail, are particularly vulnerable à € à €
