How to Fix Paper Out Issue on Epson LQ-350 Printer Are you experiencing paper out issues with your Epson LQ-350 printer? This is a common problem that can be frustrating, but there are several methods to solve it. The reasons behind "paper out indication" include using unacceptable paper for the printer, not aligning cartridges properly, not loading paper correctly, and having foreign objects in the rollers. If you're experiencing this issue, try the following steps: 1. Unplug your printer. 2. Align the cartridges properly and place the paper correctly. 3. Clean your paper rollers and printer sensors. 4. If they are worn out, replace them. After ensuring everything is correct, pull the handle from down to up and switch on your printer. This should resolve the issue quickly. Additionally, if you're experiencing problems with Epson LQ-310 printers, there's a workaround solution for vertical line alignment issues. **\*\*Epson LQ-310 Vertical Line Alignment\*\*** To fix vertical line alignment issues on your Epson LQ-310, follow these steps: 1. Ensure continuous paper is loaded. 2. Turn off your printer and press the pause button to enable bidirectional setting. 3. Wait until the printer prints something. 4. Adjust the printer settings based on the printed dot, which represents the lights on your printer. 5. Press Tear Off/Bin until it stops printing. 6. Proceed with turning off and then turning on the printer. 7. Try printing again to see if the problem is resolved.
